ASSIGNMENT FOLIO

SEO Optimization

Objective:

To improve the search engine visibility, organic traffic, and overall website performance of a newly launched website by implementing effective On-Page, Off-Page, and Technical SEO strategies.

1. Website & Keyword Planning

Analyzed the website structure and performed keyword research to identify primary, secondary, and long-tail keywords based on user search intent (informational, navigational, transactional).

2. On-Page SEO Implementation

Optimized web pages using SEO-friendly URLs, title tags, meta descriptions, and proper heading structure (H1 – H3) to improve relevance and search engine ranking.

3. Off-Page SEO Activities

Built high-quality backlinks through guest posting, business listings, profile creation, social bookmarking, and forum participation to increase domain authority.

4. Technical SEO Optimization

Improved page speed, mobile responsiveness, and HTTPS security, to ensure better crawling and indexing.

BRAND OVERVIEW

Why SEO for EveryThing?

EveryThing is a modern, tech-focused lifestyle brand built for people who want smarter products, better experiences, and everyday convenience. With a curated range of gadgets, electronics, smart devices, and lifestyle essentials. The brand operates in one of the most search-driven categories in e-commerce — where customers discover new technology, compare products, and find their next upgrade online before they ever make a purchase.

- Tech and gadget searches are high-intent and transactional — SEO connects **EveryThing** directly with customers ready to discover, compare, and buy smarter products.
- A strong tech foundation helps you discover better products, simplify everyday life, and stay connected without relying only on trends.
- Ranking for tech + lifestyle keywords (gadgets, audio, smart devices) attracts niche, loyal audiences.
- Smart technology and quality products make everyday life easier, more connected, and more enjoyable.

Robots.txt Setup

Robots.txt directs search engine crawlers — allowing product pages while blocking cart, checkout, and admin areas.

- **Allow: /**
Lets all product & content pages be crawled
- **Disallow: /cart/**
Blocks low-value, ever-changing cart URLs
- **Disallow: /checkout/**
Protects sensitive checkout flow from indexing
- **Disallow: /admin/**
Keeps backend/admin pages out of search
